

BUREAU OF LABORATORIES SERVICES GUIDE
INDEX

ABO Grouping	II-1
<i>Acanthamoeba</i> culture- see Amoeba Culture	II-2
Accreditation	I-2
Acid Fast Bacilli culture (AFB)- See Mycobacterial culture	II-34
Acylcarnitines Profile, see Newborn Screening.....	II-39
Address of Bureau of Laboratories.....	I-1
Adenovirus culture	II-1
Aerobe referred for identification (Bacterial).....	II-2
AIDS Testing, See HIV.....	II-24-27
Alcohol screen- See Drugs of Abuse screen	II-13
Amino Acid Profile, see Newborn Screening.....	II-38
Amoebae culture	II-2
Amphetamines screen- See Drugs of Abuse	II-13
Antibiotic susceptibility testing for M. TB.....	II-36
Antibody screen	II-3
Anticonvulsant Drug monitoring	II-3
Arbovirus serology	II-3
Arbovirus by PCR.....	II-4
Bacterial isolate referred for ID - See aerobe referred for ID.....	II-2
Barbiturate screen- See Drugs of Abuse	II-13
Benzoyl Ecgonine- See Cocaine & Marijuana screen	II-10
Beta hemolytic <i>Streptococcus</i> , Group A culture.....	II-5
Collection procedure for throat swab.....	III-16
Beta-hemolytic <i>Streptococcus</i> , Group B culture ...	II-5
Collection procedure for vaginal or rectal culture	III-17
Billing procedure	V-2
Billing numbers	III-5
Biotinidase Deficiency, see Newborn Screening.....	II-40
Blood Lead- see lead analysis, blood	II-29
Collection procedure.....	III-10
Blood smears for blood parasites- See Malaria smear	II-32
<i>Bordetella pertussis</i> culture	II-6
Collection procedure	III-30
<i>Bordetella pertussis</i> DNA by PCR.....	II-6
Collection procedure	III-30
Botulism	II-7
Breast smear Cytology- See Paps smear/Breast smear cytology	II-41
Collection procedure for breast smear cytology.....	III-32
<i>Campylobacter</i> see Enteric pathogens culture	II-14
Capillary blood collection for Blood lead, capillary microtainer	III-10
Capillary blood, collection for Newborn screening, Heel-stick	III-7
Capillary blood, collection for HIV testing, Finger stick for dried blood spots	III-9
CBC	II-8
CD4- See Lymphocyte Subset	II-32
CDC, specimens referred to	I-3
Cellophane Tape Prep for Pinworm Exam.....	II-43

INDEX, PAGE 2

Certification of laboratory	I-2
Chagas disease -See parasite serology	II-43
Chain-of-Custody protocol for Drugs	III-45
Chemistry panels for DHEC clinics	II-9
<i>Chlamydia</i> antigen detection by Nucleic acid Probe	II-8
Collection procedure for Gen-Probe Aptima Combo 2 procedure(swab and/or Urine)	III-38
CMV- See Cytomegalovirus culture or serology	II-12
Cocaine & marijuana screen, urine	II-10
Chain of custody Collection procedure	III-45
Complete Blood Count.. See CBC	II-8
Congenital Adrenal Hyperplasia- see Newborn Screening	II-39
<i>Corynebacterium Diphtheria</i> Culture and ID.....	II-11
County codes	III-4
Coxsackie A & B virus culture- See Enterovirus culture	II-14
<i>Cryptosporidium</i> stain	II-11
Collection procedures, Blood	III-6-12
Collection procedures, Culture.....	III-13-30
Collection procedures, Other.....	III-31-46
<i>Cyclospora</i>	II-12
Cysticercosis- See Parasite serology	II-43
Cystic Fibrosis, see Newborne Screening.....	II-40
Cytology, See PAP smear Cytology	II-41
Cytomegalovirus culture	II-12
Dairy products examinations	II-13
DHEC Program numbers	III-5
Diphtheria -See <i>Corynebacterium diphtheria</i>	II-11
Collection procedure (throat culture)	III-16
Disease reporting	I-7
Drugs of Abuse screen, urine	II-13
Chain-of-custody collection protocol	III-45
E.coli 0157 culture- see Enteric pathogens culture	II-14
Eastern Equine Encephalitis- See Arbovirus Serology	II-3
ECHO virus - See Enterovirus culture	II-14
<i>Echinococcus</i> - See parasite serology	II-43
Enteric pathogens culture	II-14
Collection procedure	III-13
<i>Enterobius Vermicularis</i> - See Pinworm Exam	II-43
Enterovirus culture	II-14
Collection procedure for stool culture	III-25
Collection procedure for throat culture	III-26
Environmental Lead- see Lead, environmental	II-29
Filariasis- See parasite serology	II-43
Food-borne illness (Food poisoning).....	II-15
Galactosemia- see Newborn Screening	II-39
Gen-Probe Nucleic acid Amplified probe for detection for GC & <i>Chlamydia</i> .	
<i>Chlamydia</i> detection.....	II-8
Gonococcal detection	II-16
Collection procedure	III-38

INDEX, PAGE 3

German measles - See Rubella serology	II-46
Giardia- see Trichrome stain	II-52
Gonorrhea (GC) Antigen detection (Gen-Probe)	II-16
Gonorrhea Culture	II-16
Collection procedure	III-14
Group A <i>Streptococcus</i> Culture- See Beta-Hemolytic <i>Streptococcus</i> Group A culture... ..	II-5
Group B <i>Streptococcus</i> culture- See Beta-Hemolytic <i>Streptococcus</i> Group B culture	II-5
Hantavirus Serology- IgG/IgM	II-18
Heavy Metal analysis- call laboratory except for lead	II-29
Hematology See CBC	II-8
Hemoglobin (Hb) Electrophoresis	II-18
Hemolytic Anemia- see Hemoglobin Electrophoresis	II-18
Hepatitis A Serology	II-19
Hepatitis B Serology	II-19-22
Hepatitis C Serology, Total Antibody	II-22
Hepatitis C, Qualitation (RIBA).....	II-23
Hepatitis C Quantitation (RNA)	II-23
Collection procedure	III-12
<i>Herpes simplex</i> culture	II-24
Collection procedure.....	III-27
HIV-1, OraSure.....	II-24
Collection procedure.....	III-29
HIV-1 PCR Qualitative (DNA).....	II-25
HIV-1 PCR Quantitative (RNA)	II-25
HIV-1 Serology	II-26
Dried blood spot collection procedure	III-9
Hookworm - See parasite examination, (O&P)	II-42
Hours of business	I-1
Hypothyroidism- See Newborn screening & Thyroid panel	II-38, II-51
Influenza virus culture	II-28
Influenza virus serology	II-28
Laboratory address and business hours	I-1
Laboratory Organization and contact persons	I-2
Lead analysis, Blood	II-29
Lead analysis, Environmental	II-29
<i>Legionella</i> culture	II-29
<i>Legionella</i> FA.....	II-30
<i>Legionella</i> serology	II-30
Leishmaniasis- See parasite serology	II-43
Leptospirosis	II-31
Lyme disease	II-31
Lymphocyte subset	II-32
Mailing address for Bureau of Laboratories	I-1
Malaria- See parasite serology	II-43
Malarial smear	II-32
MCADD see Newborn screening	II-38
Measles (Rubella) serology- see Rubella serology	II-46
Measles (Rubeola) serology see Rubeola serology	II-47

INDEX, PAGE 4

MHA-TP- see TP-PA	II-51
Microsporidium stain	II-33
Mites- See scabies	II-49
Mumps virus culture.....	II-33
Mumps virus serology	II-34
Murine Typhus serology- See Rickettsial serology	II-46
Mycobacteria	
Culture & ID	II-35
Collection procedures	III-19
Referred specimen for ID	II-35
Susceptibility testing	II-36
<i>Mycoplasma/Ureaplasma</i> Culture (Genital)	II-36
Collection procedure.....	III-24
<i>Mycoplasma pneumonia</i> culture (respiratory).....	II-37
Naegleria culture- See Amoebae culture	II-2
<i>Neisseria gonorrhoeae</i> - See Gonorrhea culture	II-16
Collection procedure	III-14
Newborn screening	II-38
Collection procedure, Heel-stick	III-7
Norovirus detection	II-41
OraSure HIV-1.....	II-24
Collection procedure.....	III-29
Ordering Test Request forms	III-2
Ordering supplies and collection kits	III-1
Ova & Parasites examination (O&P) - see parasite exam	II-42
PAP smear cytology	II-41
Collection procedures.	III-33
Parasite examination,	
General (O & P)	II-42
Collection procedure	III-40
Identification of proglottid or worm	II-42
Pinworm	II-43
Cellophane tape collection procedure	III-42
Malaria Smear	II-32
Serology	II-43
Parvo virus IgG/IgM serology	II-43
Phenylketonuria (PKU) - See newborn screening	II-38
Pinworm examination-	II-43
PKU- See newborn screening	II-38
Poliomyelitis- See enterovirus culture	II-14
Premarital testing for out of state licenses	I-4, II-44
Prenatal Panel.....	II-44
PVA preserved fecal specimen for parasitology - See Trichrome stain	II-52
Rabies examination	II-45
Remailing results	I-9
Repeat testing, billing policy	V-1
Respiratory culture, Viral	II-45
Collection procedure	III-26

INDEX, PAGE 5

Results reports I-7

Rh- see prenatal serologyII-44

Rickettsial serology, RMSF and MTII-46

Rocky Mountain Spotted Fever serology(RMSF)- see Rickettsial serology.....II-46

RPR- see Syphilis SerologyII-50

Rubella SerologyII-46

Rubeola Serology - See measles serologyII-47

Salmonella- See Enteric pathogens cultureII-14

SARSII-48

ScabiesII-49

 Collection procedure, skin scrapings III-44

Schistosome analysisII-49

Schistosomiasis serology - see parasite serologyII-43

Scotch Tape prep for pinworm - See Pinworm examII-43

Sender number, obtaining III-4

Shigella- See Enteric pathogens cultureII-14

Shipping specimens to lab

 Definitions IV-2

 Shipping Diagnostic specimens via U.S. Mail and State courier

 Clinical specimens IV-6

 Microscope slides IV-1

 Blood spots for newborn screening and HIV IV-1

 Shipping Diagnostic specimens and Infectious substances via a commercial carrier IV-6

 Shipping reminders..... IV-13

 Shipping forms IV-15

Shipping containers, obtaining III-1

Sickle Cell - See Hemoglobin Electrophoresis and Newborn Screening II-18, II-38

Skin scrapings for Scabies.....II-49

Specimen rejection criteria I-5

Sporotrichosis serologyII-50

St. Louis Equine Encephalitis - see Arbovirus serologyII-3

Staphylococcus- see enteric pathogens cultureII-14

Stool culture for enteric pathogens - see Enteric pathogens cultureII-14

 Collection Procedure III-13

Streptococcus, Group A (Pyogenes) - see beta-hemolytic *Streptococcus*, Group AII-5

Streptococcus Group B - see Beta-hemolytic *Streptococcus* ,Group B cultureII-5

Supplies, obtaining III-1

Susceptibility Testing for mycobacteria- See Mycobacteria, susceptibilityII-36

Syphilis serology Screen (RPR)II-50

T4 lymphocytes- see Lymphocyte subsetII-32

TB culture- See Mycobacteria, culture & IDII-34

Testing policies..... I-3

Test request forms, instructions for completing III-3

Test request forms, ordering III-2

Tetrahydrocannabinol (THC) (Marijuana)

 See Cocaine & Marijuana screenII-10

 See Drugs of Abuse screen.....II-13

Thyroid panel, non-neonatal & confirmatory neonatalII-51

INDEX, PAGE 6

TORCH batteryII-51
Toxocara - see parasite serologyII-43
Toxoplasma Serology, see parasite serologyII-43
TP-PAII-51
Treponemal antibody serology- See TP-PAII-51
Trichinosis - see parasite serologyII-43
Trichrome stain.....II-52
Tuberculosis culture- see Mycobacteria, culture & ID.....II-34
TularemiaII-52
Ureaplasma- see Mycoplasma/Ureaplasma cultureII-36
 Collection procedure III-24
UrinalysisII-53
Urine Drug analysis - See Drugs of Abuse, urineII-13
Varicella virus cultureII-54
Varicella serologyII-54
VDRLII-54
Venipuncture procedure III-6
Vibrio- See Enteric pathogens cultureII-14
Viral culture, routine see specific groups or viruses
Viral isolate for IDII-55
Viral Load, Hepatitis C- see Hepatitis PCR Quantitation (RNA)II-23
Viral Load- HIV- See HIV-1 PCR Quantitative (RNA)II-25
Visceral Larva Migrans- See parasite serologyII-43
West Nile Virus Serology.....II-56
Western Equine Encephalitis- See arbovirus serologyII-3
Whooping Cough- See *Bordetella pertussis*II-6
Yersinia- See Enteric pathogens cultureII-14
